IIE Transactions (1998) **30**, 1205–1218

DESIGN & MANUFACTURING

AUTHOR INDEX FOR 1998

Alrashdan, A., S. Motavalli and V. Suharitdamrong; *Design model generation for reverse engineering using multi-sensors*; April; 357

Altiok, T. and E. Dogan-Sahiner; *Planning repair effort in transfer time lines*; October; 867

Altiok, T. and H. Yamashita; *Buffer capacity allocation for a desired throughput in production lines*; October; 883

Ammons, J.C., C. Jacobs-Blecha, A. Schutte and T. Smith; *Cut order planning for apparel manufacturing*; January; 79

Arzi, Y. and A. Kalir; *Optimal design of flexible production lines with unreliable machines and infinite buffers*; April; 391

Askin, R.G. and Ming Zhou; *Formulation of independent flow-line cells based on operation requirements and machine capabilities*; April; 319

Banerjee, P., D. Zetu and P. Schneider; *Data input model for virtual reality-aided facility layout*; July; 597

Barash, M.M., A.V. Deshmukh and J.J. Talavage; *Complexity in manufacturing systems, Part 1: Analysis of static complexity*; July; 645

Birge, J.R. and H.B. Nembhard; *A startup procedure for process industries using a multiple objective nonlinear program*; April; 291

Bozer, Y., C.A. Yano and M. Kamoun; *Optimizing dock configuration and staffing in decentralized receiving*; July; 657

Chase, K.W., J. Gao and S.P. Magleby; *Generalized 3-D tolerance analysis of mechanical assemblies with small kinematic adjustments*; April; 367

Chhajed, D., V. Ning Hsu and T.J. Lowe; *Tool design problems in a punch press flexible manufacturing system*; April; 331

Chu, Chi-Cheng P., T.H. Dani and R. Gadh; *Evaluation of virtual reality interface for product shape design*; July; 629

Dani, T.H., Chi-Cheng P. Chu and R. Gadh; *Evaluation of virtual reality interface for product shape designs*; July; 629

Davis, R.P. and T.K. Keyser; *Distributed computing approaches toward manufacturing scheduling problems*; April; 379

Deshmukh, A.V., J.J. Talavage and M.M. Barash; *Complexity in manufacturing systems, Part 1: Analysis of static complexity*; July; 645

Diachin, D., L. Freitag, D. Heath, J. Herzog and W. Michels; *Interactive simulation and visualization of massless, massed, and evaporating particles*; July; 621

Dogan-Sahiner, E. and T. Altiok; *Planning repair effort in transfer time lines*; October; 867

Drezner, Z. and G.O. Wesolowsky; *Optimal axis orientation for rectilinear minisum and minimax location*; October; 981

Duenyas, I. and P. Patana-Anake; *Base-stock control for single-product tandem make-to-stock systems*; January; 31

Egbelu, P.J. and Chung-Te Wu; *Relative positioning of a load extractor for a storage carousel*; April; 301

Fang, Y.C., C.C. Hsieh, M.E. Wang, C.K. Wang, M.J. Kim, S.Y. Shin and T.C. Woo; *Noise smoothing for VR equipment in quaternions*; July; 581

Feng, S.C. and Chun Zhang; *A modular architecture for rapid development of CAPP systems for agile manufacturing*; October; 893

Fortes, J.A.B., N. Khanna and S.Y. Nof; *A formalism to structure and parallelize the integration of cooperative engineering design tasks*; January; 1

Freitag, L., D. Diachin, D. Heath, J. Herzog and W. Michels; *Interactive simulation and visualization of massless, massed, and evaporating particles*; July; 621

Gadh, R., Chi-Cheng P. Chu and T.H. Dani; *Evaluation of virtual reality interface for product shape designs*; July; 629

Gadh, R. and K. Lee; *Destructive disassembly to support virtual prototyping*; October; 959

Gao, J., K.W. Chase and S.P. Magleby; *Generalized 3-D tolerance analysis of mechanical assemblies with small kinematic adjustments*; April; 367

Gau, Yuh-Shying and D. Veeramani; *Issues in patch-by-patch machining of compound sculptured surfaces*; April; 341

Gea, Hae Chang and R. Ramamurthy; *Blank design optimization on deep drawing of square shells*; October; 913

Geddem, A. and S. Kaldor; *Interlinking dimensional tolerances with geometric accuracy and surface finish in the process design and manufacture of precision machined components*; October; 905

Gerchak, Y. and X. Lu; *Minimizing the expected response time of an idled server on a line*; April; 401

Gupta, S. and V. Krishnan; *Product family-based assembly sequence design methodology*; October; 933

Heath, D., D. Diachin, L. Freitag, J. Herzog and W. Michels; *Interactive simulation and visualization of massless, massed, and evaporating particles*; July; 621

Hetzog, J., D. Diachin, L. Freitag, D. Heath and W. Michels; *Interactive simulation and visualization of massless, massed, and evaporating particles*; July; 621

Hsieh, C.C., Y.C. Fang, M.E. Wang, C.K. Wang, M.J. Kim, S.Y. Shin and T.C. Woo; *Noise smoothing for VR equipment in quaternions*; July; 581

Hsu, V. Ning, D. Chhajed and T.J. Lowe; *Tool design problems in a punch press flexible manufacturing system*; April; 331

Hung, Chao-Yen and T.A. Lacksonen; *Project scheduling algorithms for re-layout projects*; January; 91

Jacobs-Blecha, C., J.C. Ammons, A. Schutte and T. Smith; *Cut order planning for apparel manufacturing*; January; 79

Jeong, Keun-Chae and Yeong-Dae Kim; *Performance analysis of assembly/disassembly systems with unreliable machines and random processing times*; January; 41

Johnson, M.E.; *The impact of sorting strategies on automated sortation system performance*; January; 67

Joneja, A. and N. Lee; *A modular, parametric vibratory feeder: a case study for flexible tolls for mass customization*; October; 923

Kaldor, S. and A. Geddem; *Interlinking dimensional tolerances with geometric accuracy and surface finish in the process design and manufacture of precision machined components*; October; 905

Kalir, A. and Y. Arzi; *Optimal design of flexible production lines with unreliable machines and infinite buffers*; April; 391

Kamoun, M., C.A. Yano and Y. Bozer; *Optimizing dock configuration and staffing in decentralized receiving*; July; 657

Keyser, T.K. and R.P. Davis; *Distributed computing approaches toward manufacturing scheduling problems*; April; 379

Khanna, N., J.A.B. Fortes and S.Y. Nof; *A formalism to structure and parallelize the integration of cooperative engineering design tasks*; January; 1

Kim, D.S.; *The equivalence of two-station closed and open serial production systems with finite buffers*; January; 101

0740-817X © 1998 "IIE"

Kim, Jae-gon and Yeong-Dae Kim; *A space partitioning method for facility layout problems with shape constraints*; October; 947
Kim, M.J., C.C. Hsieh, Y.C. Fang, M.E. Wang, C.K. Wang, S.Y. Shin and T.C Woo; *Noise smoothing for VR equipment in quaternions*; July; 581
Kim, Yeong-Dae and Jae-Gon Kim; *A space partitioning method for facility layout problems with shape constraints*; October; 947
Kim, Yeong-Dae and Keun-Chae Jeong; *Performance analysis of assembly/disassembly systems with unreliable machines and random processing times*; January; 41
Krishnan, V. and S. Gupta; *Product family-based assembly sequence design methodology*; October; 933

Lacksonen, T.A. and Chao-Yen Hung; *Project scheduling algorithms for re-layout projects*; January; 91
Lee, H.F. and K.E. Stecke; *Production planning for flexible flow systems with limited machine flexibility*; July; 669
Lee K. and R. Gadh; *Destructive disassembly to support virtual prototyping*; October; 959
Lee, N. and A. Joneja; *A modular, parametric vibratory feeder: a case study for flexible tolls for mass customization*; October; 923
Li, Man, B.H. Wilson, R.R. Mourant and Weidong Xu; *A virtual environment for training overhead crane operators: real-time implementation*; July; 589
Lowe, T.J., V. Ning Hsu and D. Chhajed; *Tool design problems in a punch press flexible manufacturing system*; April; 331
Lu, X. and Y. Gerchak; *Minimizing the expected response time of an idled server on a line*; April; 401

Magleby, S.P., J. Gao and K.W. Chase; *Generalized 3-D tolerance analysis of mechanical assemblies with small kinematic adjustments*; April; 367
Michels, W., D. Diachin, L. Freitag. D. Heath and J. Herzog; *Interactive simulation and visualization of massless, massed, and evaporating particles*; July; 621
Motavalli, S., V. Suharitdamrong and A. Alrashdan; *Design model generation for reverse engineering using multi-sensors*; April; 357
Mourant, R.R., B.H. Wilson, Man Li and Weidong Xu; *A virtual environment for training overhead crane operator: real-time implementation*; July; 589

Nembhard, H.B. and J.R. Birge; *A startup procedure for process industries using a multiple objective nonlinear program*; April; 291
Nof, S.Y., N. Khanna and J.A.B. Fortes; *A formalism to structure and parallelize the integration of cooperative engineering design tasks*; January; 1

Patana-Anake, P. and I. Duenyas; *Base-stock control for single-product tandem make-to-stock systems*; January; 31
Perros, H.G. and Y. Rhee; *On the mean waiting time of a population constrained open tandem queueing network with constant service times*; October; 973
Powell, S.G. and D.F. Pyke; *Buffering unbalanced assembly systems*; January; 55
Pyke, D.F. and S.G. Powell; *Buffering unbalanced assembly systems*; January; 55

Rhee, Y. and H.G. Perros; *On the mean waiting time of a population constrained open tandem queueing network with constant service times*; October; 973
Ramamurthy, R. and Hae Chang Gea; *Blank design optimization on deep drawing of square shells*; October; 913

Schneider, P., D. Zetu, and P. Banerjee; *Data input model for virtual reality-aided facility layout*; July; 597
Schutte, A., C. Jacobs-Blecha, J.C. Ammons and T. Smith; *Cut order planning for apparel manufacturing*; January; 79
Shin, S.Y., C.C. Hsieh, Y.C. Fang, M.E. Wang, C.K. Wang, M.J. Kim and T.C. Woo; *Noise smoothing for VR equipment in quaternions*; July; 581
Smith, T., C. Jacobs-Blecha, J.C. Ammons and A. Schutte; *Cut order planning for apparel manufacturing*; January; 79
Stecke, K.E. and H.F. Lee; *Production planning for flexible flow systems with limited machine flexibility*; July; 669
Suharitdamrong, V., S. Motavalli and A. Alrashdan; *Design model generation for reverse engineering using multi-sensors*; April; 357

Talavage, J.J., A.V. Deshmukh and M.M. Barash; *Complexity in manufacturing systems, Part1: Analysis of static complexity*; July; 645

Veeramani, D. and Yuh-Shying Gau; *Issues in patch-by-patch machining of compound sculptured surfaces*; April; 341

Wang, C.K., C.C. Hsieh, Y.C. Fang, M.E. Wang, M.J. Kim, S.Y. Shin and T.C. Woo; *Noise smoothing for VR equipment in quaternions*; July; 581
Wang, Hsu-Pin and C. Zhang; *Robust design of assembly and machining tolerance allocations*; January; 17
Wang, M.E., C.C. Hsieh, Y.C. Fang, C.K. Wang, M.J. Kim, S.Y. Shin and T.C. Woo; *Noise smoothing for VR equipment in quaternions*; July; 581
Wesolowsky, G.O. and Z. Drezner; *Optimal axis orientation for rectilinear minisum and minimax location*; October; 981
Wilson, B.H., R.R. Mourant Man Li and Weidong Xu; *A virtual environment for training overhead crane operators: real-time implementation*; July; 589
Woo, T.C., C.C. Hsieh, Y.C. Fang, M.E. Wang, C.K. Wang, M.J. Kim and S.Y. Shin; *Noise smoothing for VR equipment in quaternions*; July; 581
Wu, Chung-Te and P.J. Egbelu; *Relative positioning of a load extractor for a storage carousel*; April; 301

Xu, Weidong, B.H. Wilson, R.R. Mourant and Man Li; *A virtual environment for training overhead crane operators: real-time implementation*; July; 589

Yamashita, H. and T. Altiok; *Buffer capacity allocation for a desired throughput in production lines*; October; 883
Yano, C.A., Y. Bozer and M. Kamoun; *Optimizing dock configuration and staffing in decentralized receiving*; July; 657

Zetu, D., P. Banerjee and P. Schneider; *Data input model for virtual reality-aided facility layout*; July; 597
Zhang, C. and Hsu-Pin Wang; *Robust design of assembly and machining tolerance allocations*; January; 17
Zhang, Chun and S.C. Feng; *A modular architecture for rapid development of CAPP systems for agile manufacturing*; October; 893
Zhou, Ming and R.G. Askin; *Formulation of independent flow-line cells based on operation requirements and machine capabilities*; April; 319

SUBJECT INDEX FOR 1998

1010

Chu, C-C.P.; *Evaluation of virtual reality interface for product shape designs*; July; 629

1020

Khanna, N., J.A.B. Fortes and S.Y. Nof; *A formalism to structure and parallelize the integration of cooperative engineering design tasks*; January; 1

1030

Lee, K. and R. Gadh; *Destructive disassembly to support virtual prototyping*; October; 959

1040

Hsu, V.N., D. Chhajed and T.J. Lowe; *Tool design problems in a punch press flexible manufacturing system*; April; 331

Motavalli, S., V. Suharitdamrong and A. Alrashdan; *Design model generation for reverse engineering using multi-sensors*; April; 357

Gea, H.C. and R. Ramamurthy; *Blank design optimization on deep drawing of square shells*; October; 913

1160

Joneja, A. and N. Lee; *A modular, parametric vibratory feeder: a case study for flexible tools for mass customization*; October; 923

1190

Hsieh, C.C., Y.C. Fang, M.E. Wang, C.K. Wang, M.J. Kim, S.Y. Shin and T.C. Woo; *Noise smoothing for VR equipment in quaternions*; July; 581

1210

Zhang, C. and H-P. Wang; *Robust design of assembly and machining tolerance allocations*; January; 17

Gao, J., K.W. Chase and S.P. Magleby; *Generalized 3-D tolerance analysis of mechanical assemblies with small kinematic adjustments*; April; 367

Gupta, S. and V. Krishnan; *Product family-based assembly sequence design methodology*; October; 933

1280

Veeramani, D. and Y-S. Gau; *Issues in patch-by-patch machining of compound sculptured surfaces*; April; 341

Kalir, A. and Y. Arzi; *Optimal design of flexible production lines with unreliable machines and infinite buffers*; April; 391

Lu, X. and Y. Gerchak; *Minimizing the expected response time of an idled server on a line*; April; 401

Feng, S.C. and C. Zhang; *A modular architecture for rapid development of CAPP systems for agile manufacturing*; October; 893

Geddam, A. and S. Kaldor; *Interlinking dimensional tolerances with geometric accuracy and surface finish in the process design and manufacture of precision machined components*; October; 905

1290

Wilson, B.H., R.R. Mourant, M. Li and W. Xu; *A virtual environment for training overhead crane operators: real-time implementation*; July; 589

Diachin, D., L. Freitag, D. Heath, J. Herzog and W. Michels; *Interactive simulation and visualization of massless, massed, and evaporating particles*; July; 621

1320

Lee, H.F. and K.E. Stecke; *Production planning for flexible flow systems with limited machine flexibility*; July; 669

1330

Jeong, K-C. and Y-D. Kim; *Performance analysis of assembly/disassembly systems with unreliable machines and random processing times*; January; 41

Powell, S.G. and D.F. Pyke; *Buffering unbalanced assembly systems*; January; 55

Johnson, M.E.; *The impact of sorting strategies on automated sortation system performance*; January; 67

Kim, D.S.; *The equivalence of two-station closed and open serial production systems with finite buffers*; January; 101

Deshmukh, A.V., J.J. Talavage and M.M. Barash; *Complexity in manufacturing systems, Part 1: Analysis of static complexity*; July; 645

Dogan-Sahiner, E. and T. Altiok; *Planning repair effort in transfer lines*; October; 867

Yamashita, H. and T. Altiok; *Buffer capacity allocation for a desired throughput in production lines*; October; 883

Rhee, Y. and H.G. Perros; *On the mean waiting time of a population constrained open tandem queueing network with constant service times*; October; 973

Duenyas, I. and P. Patana-Anake; *Base-stock control for single-product tandem make-to-stock systems*; January; 31

Jacobs-Blecha, C., J.C. Ammons, A. Schutte and T. Smith; *Cut order planning for apparel manufacturing*; January; 79

Nembhard, H.B. and J.R. Birge; *A startup procedure for process industries using a multiple objective nonlinear program*; April; 291

Keyser, T.K. and R.P. Davis; *Distributed computing approach toward manufacturing scheduling problems*; April; 379

1410

Egbelu, P.J. and C-T. Wu; *Relative positioning of a load extractor for a storage carousel*; April; 301

Zetu, D., P. Banerjee and P. Schneider; *Data input model for virtual reality-aided facility layout*; July; 597

Yano, C.A., Y. Bozer and M. Kamoun; *Optimizing dock configuration and staffing in decentralized receiving*; July; 657

Kim, J-G. and Y-D. Kim; *A space partitioning method for facility layout problems with shape constraints*; October; 947

Drezner, Z. and G.O. Wesolowsky; *Optimal axis orientation for rectilinear minisum and minimax location*; October; 981

1440

Lacksonen, T.A. and C-Y. Hung; *Project scheduling algorithms for re-layout projects*; January; 91

Askin, R.G. and M. Zhou; *Formation of independent flow-line cells based on operation requirements and machine capabilities*; April; 319

GUEST REVIEWERS FOR 1998

Celestine Aguwa, University of Pittsburgh
Tayfur Altiok, Rutgers University
Sam Anand, University of Cincinnati
Jose Arantes, University of Cincinnati
Y. Arzi, Tel Aviv University
S. Athavale, Ford Scientific Research Labs

Adedeji Badiru, University of Oklahoma

Sherman Bai, University of Florida
Kenneth R. Baker, Dartmouth College
Golgen Bengu, New Jersey Institute of Technology
Gilmer L. Blankenship, University of Maryland
Melissa Bowers, University of Tennessee

Gerard Cachon, Duke University
Kirsten Carr, Ford Scientific Research Labs
Jeya Chandra, Penn State University
Tien-Chien Chang, Purdue University
Kenneth Chase, Bringham Young University
Raymond Cheung, The Hong Kong University of Science and Technology
Wen-Chyuan Chiang, University of Tulsa
Byoung K. Choi, KAIST
Elaine Chow, Rensselaer Polytechnic Institute
Chao-Hsien Chu, Iowa State University
Robert Cooper, Florida Atlantic University
Robert Cvetko, Boeing Corporation

Cihan Dagli, University of Missouri-Rolla
Wayne Davis, University of Illinois-Champaign-Urbana
A. Deshmukh, University of Massachusetts
Zuomin Dong, University of Victoria, Canada
Debasish Dutta, University of Michigan-Ann Arbor
S.P. Dutta, University of Windsor

B. El Khasawneh, University of Illinois
Steve Erlenbacher, Washington University

Changxue Jack Feng, Penn State University
Lori Freitag, Argonne National Lab

Rajit Gadh, University of Wisconsin-Madison
Alberto Garcia-Diaz, Texas A&M University
Doug Gemmill, Iowa State University
Boaz Golany, Technion - IIT
A. Gunasekharan, Brunel University
S.K. Gupta, The Robits Institute at Carnegie Mellon University

Warren Hausman, Stanford University
S. Jack Hu, The University of Michigan
Zhong-Sheng Hua, University of Science & Technology, China

Leslie Interrante, Integrated Product Development
Shahrukh Irani, Ohio State University

Cecil Joe, University of New Orleans
Ajay Joneja, Hong Kong University of Science of Technology

Justin Kidder, University of Pittsburgh
P.R. Kumar, University of Illinois

Michael Lachance, University of Michigan-Dearborn
Thomas Landers, University of Arkansas
Mark Lawley, Purdue University
Kunwoo Lee, Seoul National University, Korea
Kemper Lewis, SUNY at Buffalo
Ming Liang, University of Ottawa
John-Tae Lim, Korea Advanced Institute of Science and Technology
Sheldon Lou, California State University-San Marcos

Fakeha Malik, Rensselaer Polytechnic Institute
Charles Malmborg, Rensselaer Polytechnic Institute
Michael Marefat, University of Arizona
Deborah Medeiros, Penn State University
Sanjay Mehrotra, Northwestern University
S. Melkote, Georgia Institute of Technology

Kevin Passino, Ohio State University
Brett Peters, Texas A&M University
Mike Pratt, National Institute of Standards and Technology

Greg Rahn, Motorola Corporation
Srinivasan Rajagopalan, Rensselaer Polytechnic Institute
Uday S. Rao, Carnegie Mellon University
Spiridon Reveliotis, Georgia Institute of Technology
Utpal Roy, Syracuse University
Oscar Ruiz, EAFIT University, Columbia

S. Sarin, North California A&T University
Bhaba Sarker, Louisiana State University
Suresh Sethi, University of Texas at Dallas
Jami Sha, Arizona State University
Gunter Sharp, Georgia Institute of Technology
Dong Shaw, Purdue University
Hayong Shin, Chrysler Corporation
Chang Shu, Boston University
Jeffrey Smith, Texas A&M University
MacGregor Smith, University of Massachusetts
R. Srikant, University of Illinois
Sriruk Sritongchai, University of Pittsburgh
Duane W. Storti, University of Washington
Kim Surmmerhays, University of San Francisco
Nallan Suresh, SUNY at Buffalo
John Sutherland, Michigan Technological University
Mike Swihart, Purdue University
Mathhew Szymanski, Argonne National Lab

Fataneh Taghaboni-Dutta, Flint School of Management
Jose Tanchoco, Purdue University
Sanjeev Trika, Intel Corporation
Wade Trozell, Colorado State University
Oya Icmeli Tukel, Cleveland State University

David M. Uptown, Harvard University

Asoo Vakharia, University of Florida
Uday Venkatadri, Université Laval

Yanfeng Wang, Boston University
Ue-Pyng Wen, National Tsing Hua University
Richard Weston, Loughborough University, United Kingdom

Zhao Xiaobo, Tsinghua University

Nong Ye, Arizona State University
Sencer Yeralan, University of Florida

Qing Zhang, University of Georgia
Yu-Sheng Zheng, University of Pennsylvania
Ming Zhou, Indiana State University

SCHEDULING & LOGISTICS

AUTHOR INDEX FOR 1998

Abad, P.L. and D.J. Buchanan; *Optimal policy for a periodic review returnable inventory system*; November; 1049

Adan, I., J. Verrijdt and T. de Kok; *A trade-off between emergency repair and inventory investment*; February; 119

Al-Loughani and H.D. Sherali; *Equivalent primal and dual differentiable reformulations of the Euclidean multifacility location problem*; November; 1065

Anupindi, R. and Y. Bassok; *Approximations for multiproduct contracts with stochastic demands and business volume discounts: single supplier case*; August; 723

Arcelus, F.J. and G. Srinivasan; *Ordering policies under one time only discount and price sensitive demand*; November; 1057

Armstrong, M.J. and D.A. Atkins; *A note on joint optimization of maintenance and inventory*; February; 143

Arreola-Risa, A. and G.A. DeCroix; *Make-to-order versus make-to-stock in a production–inventory system with general production times*; August; 705

Arreola-Risa, A. and G.A. DeCroix; *On offering economic incentives to backorder*; August; 715

Atkins, D.A. and M.J. Armstrong; *A note on joint optimization of maintenance and inventory*; February; 143

Azizoglu, M., M. Koksalan and S.K. Kondakci; *Minimizing flowtime and maximum earliness on a single machine*; February; 191

Barman, S.; *The impact on priority rule combinations on lateness and tardiness*; May; 493

Bassok, Y. and R. Anupindi; *Approximations for multiproduct contracts with stochastic demands and business volume discounts: single supplier case*; August; 723

Benjaafar, S. and D. Gupta; *Scope versus focus: issues of flexibility, capacity, and number of production facilities*; May; 413

Buchanan, D.J. and P.L. Abad; *Optimal policy for a periodic review returnable inventory system*; November; 1049

Cai, X., C.J. Goh and A.I. Mees; *Greedy heuristics for rapid scheduling of trains on a single track*; May; 479

Cai, Xiaogiang, Chung-Lun Li and Chung-Yee Lee; *Scheduling with multiple-job-on-one-processor pattern*; May; 433

Caramanis, M.C. and C.A. Kaskavelis; *Efficient Lagrangian relaxation algorithms for industry size job-shop scheduling problems*; November; 1085

Cheng, T.C.E. and Guoqing Wang; *Batching and scheduling to minimize the makespan in the two-machine flowshop*; May; 447

Chen, J. and G. Steiner; *Lot streaming with attached setups in three-machine flow shops*; November; 1075

Cheung, Ki Ling; *A continuous review inventory model with a time discount*; August; 747

DeCroix, G.A. and A. Arreola-Risa; *Make-to-order versus make-to-stock in a production–inventory system with general production times*; August; 705

DeCroix, G.A. and A. Arreola-Risa; *On offering economic incentives to backorder*; August; 715

de Kok, T., J. Verrijdt and I. Adan; *A trade-off between emergency repair and inventory investment*; February; 119

de Koster, R. and E. van der Poort; *Routing orderpickers in a warehouse: a comparison between optimal and heuristic solutions*; May; 467

Erlebacher, S., K. Palaka and D.H. Kropp; *Lead-time setting, capacity utilization, and pricing decisions under lead-time dependent demand*; February; 151

Eynan, A. and D.H. Kropp; *Periodic review and joint replenishment in stochastic demand environments*; November; 1025

Goh, C.J., X. Cai and A.I. Mees; *Greedy heuristics for rapid scheduling of trains on a single track*; May; 479

Gupta, D. and S. Benjaafar; *Scope versus focus: issues of flexibility, capacity, and number of production facilities*; May; 413

Guu, Sy-Ming and A. X. Zhang; *The multiple lot sizing problem with rigid demand and interrupted geometric yield*; May; 427

Hahm, J., I. Moon, and C. Lee; *The effect of the stabilization period on the economic lot scheduling problem*; November; 1009

Hertz, A., G. Laporte, M. Mittaz and K.E. Stecke; *Heuristics for minimizing tool switches when scheduling part types on a flexible machine*; August; 689

Kamrad, B. and S. Lele; *Production, operating risk and market uncertainty: a valuation perspective on controlled policies*; May; 455

Karabuk, S. and I. Sabuncuoglu; *A beam search-based algorithm and evaluation of scheduling approaches for flexible manufacturing systems*; February; 177

Kaskavelis, C.A. and M.C. Caramanis; *Efficient Lagrangian relaxation algorithms for industry size job-shop scheduling problems*; November; 1085

Kellerer, H.; *Algorithms for multiprocessor scheduling with machine release times*; November; 991

Kobza, J.E., Yu-Cheng Shen and R.J. Reasor; *A stochastic model of empty-vehicle travel time and load request service time in light-traffic material handling systems*; February; 133

Koksalan, M., M. Azizoglu and S.K. Kondakci; *Minimizing flowtime and maximum earliness on a single machine*; February; 191

Kondacki, S.K., M. Koksalan and M. Azizoglu; *Minimizing flowtime and maximum earliness on a single machine*; February; 191

Kouvelis, P. and G. Vairaktarakis; *Flowshops with processing flexibility across production stages*; August; 735

Kropp, D.H. and A. Eynan; *Periodic review and joint replenishment in stochastic demand environments*; November; 1025

Kropp, D.H., K. Palaka and S. Erlebacher; *Lead-time setting, capacity utilization, and pricing decisions under lead-time dependent demand*; February; 151

Laporte, G., A. Hertz, M. Mittaz and K.E. Stecke; *Heuristics for minimizing tool switches when scheduling part types on a flexible machine*; August; 689

Lee, C., I. Moon and J. Hahm; *The effect of the stabilization period on the economic lot scheduling problem*; November; 1009

Lee, Chung-Yee, Chung-Lun Li and Xiaoqiang Cai; *Scheduling with multiple-job-on-one-processor pattern*; May; 433

Lele, S. and B. Kamrad; *Production, operating risk and market uncertainty: a valuation perspective on controlled policies*; May; 455

Li, Chung-Lun, Xiaoqiang Cai and Chung-Yee Lee; *Scheduling with multiple-job-on-one-processor pattern*; May; 433

Mees, A.I., X. Cai and C.J. Goh; *Greedy heuristics for rapid scheduling of trains on a single track*; May; 479

Mehta, S.V. and R. Uzsoy; *Minimizing total tardiness on a batch processing machine with incompatible job families*; February; 165

Mittaz, M., A. Hertz, G. Laporte and K.E. Stecke; *Heuristics for minimizing tool switches when scheduling part types on a flexible machine*; August; 689

Moon, I., J. Hahm and C. Lee; *The effect of the stabilization period on the economic lot scheduling problem*; November; 1009

Özdamar, L.; *On scheduling project activites with variable expenditure rates*; August; 695

Palaka, K., S. Erlebacher and D.H. Kropp; *Lead-time setting, capacity utilization, and pricing decisions under lead-time dependent demand*; February; 151
Palni, L. and D. Sinriech; *Scheduling pickup and deliveries in a multiple-load discrete carrier environment*; November; 1035
Pinedo, M. and M. Singer; *A computational study of branch and bound techniques for minimizing the total weighted tardiness in job shops*; February; 109

Reasor, R.J., J.E. Kobza and Yu-Cheng Shen; *A stochastic model of empty-vehicle travel time and load request service time in light-traffic material handling systems*; February; 133

Sabuncuoglu, I. and S. Karabuk; *A beam search-based algorithm and evaluation of scheduling approaches for flexible manufacturing systems*; February; 177
Shen, Yu-Cheng, J.E. Kobza and R.J. Reasor; *A stochastic model of empty-vehicle travel time and load request service time in light-traffic material handling systems*; February; 133
Sherali, H.D. and I. Al-Loughani; *Equivalent primal and dual differentiable reformulations of the Euclidean multifacility location problem*; November; 1065
Singer, M. and M. Pinedo; *A computational study of branch and bound techniques for minimizing the total weighted tardiness in job shops*; February; 109
Sinriech, D. and L. Palni; *Scheduling pickup and deliveries in a multiple-load discrete carrier environment*; November; 1035
Srinivasan, G. and F.J. Arcelus; *Ordering policies under one time only discount and price sensitive demand*; November; 1057
Stecke, K.E., A. Hertz, G. Laporte and K.E. Stecke; *Heuristics for minimizing tool switches when scheduling part types on a flexible machine*; August; 689
Steiner, G. and J. Chen; *Lot streaming with attached setups in three-machine flow shops*; November; 1075

Tetzlaff, U.A.W.; *Optimal order release decisions for asynchronous production systems*; November; 1001

Uzsoy, R. and S.V. Mehta; *Minimizing total tardiness on a batch processing machine with incompatible job families*; February; 165

Vairaktarakis, G. and P.A. Kouvelis; *Flowshops with processing flexibility across production stages*; August; 735
van der Poort, E. and R. de Koster; *Routing orderpickers in a warehouse: a comparison between optimal and heuristic solutions*; May; 467
Verrijdt, J., I. Adan and T. de Kok; *A trade-off between emergency repair and inventory investment*; February; 119
Vickson, R.G.; *Optimal inspection subplots for deteriorating batch production*; November; 1019

Wang, Guoqing and T.C.E. Cheng; *Batching and scheduling to minimize the makespan in the two-machine flowshop*; May; 447

Zhang, A. X. and Sy-Ming Guu; *The multiple lot sizing problem with rigid demand and interrupted geometric yield*; May; 427

OPERATIONS ENGINEERING

AUTHOR INDEX FOR 1998

Askin, R. and A. Iyer; *Modeling and simulation operating policies for manufacturing cells*; September; 785

Bard, J.F., Liu Huang, M. Dror and P. Jaillet; *A branch and cut algorithm for the VRP with satellite facilities*; September; 821
Bodner, D.A., S. Narayanan, U. Sreekanth, T. Govindaraj, L.F. McGinnis and C.M. Mitchell; *Research in object-orientated manufacturing simulations: an assessment of the state of the art*; September; 795
Briggs, D.D., M. Mollaghasemi and J.A. Sepúlveda; *An automated approach for planning mass tactical airbourne operations*; September; 765
Brusco, M.J.; *Solving personnel tour scheduling problems using the duel all-integer cutting plane*; September; 835

Chi, C.-F. and C.G. Drury; *Do people choose an optimal response criterion in an inspection task?*; March; 257
Chien, C.; *When should we superpose M/G/1 queues?*; March; 267
Chiu, Chih-Chou and D.F. Cook; *Using radial basis function neural networks to recognize shifts in correlated manufacturing process parameters time in light-traffic material handling systems*; March; 227
Cook, D.F. and Chih-Chou Chiu; *Using radial basis function neural networks to recognize shifts in correlated manufacturing process parameters time in light-traffic material handling systems*; March; 227
Curry, G., S. Venkatesh, J. Smith and B. Deuermeyer; *Deadlock detection and resolution for discrete-event simulation: multiple-unit seizes*; March; 201

Deuermeyer, B., S. Venkatesh, J. Smith and G. Curry; *Deadlock detection and resolution for discrete-event simulation: multiple-unit seizes*; March; 201
Dror, M., J.F. Bard, Liu Huang and P. Jaillet; *A branch and cut algorithm for the VRP with satellite facilities*; September; 821
Drury, C.G., and C.-F. Chi; *Do people choose an optimal response criterion in an inspection task?*; March; 257

Fishwick, P.A.; *A taxonomy for simulation modeling based on programming language principles*; September; 811

Govindaraj, T. S. Narayanan, D.A. Bodner, U. Sreekanth, L.F. McGinnis and C.M. Mitchell; *Research in object-orientated manufacturing simulations: an assessment of the state of the art*; September; 795

Haddock, J., D.C. Schmidt, S. Marchandon, G.C. Runger, W.A. Wallace and R.N. Wright; *A methodology for formulating, formalizing, validating and evaluating a real-time process control advisor*; March; 235
Huang, Liu, J.F. Bard, M. Dror and P. Jaillet; *A branch and cut algorithm for the VRP with satellite facilities*; September; 821

Iyer, A. and R. Askin; *Modeling and simulation operating policies for manufacturing cells*; September; 785

Jaillet, P., J.F. Bard, Liu Huang and M. Dror; *A branch and cut algorithm for the VRP with satellite facilities*; September; 821

Karacel, S.C. and J.H. Mize; *A formal structure for discrete event simulation. Part II: Object-oriented software implementation for manufacturing systems*; March; 217

Lau, A. Hing-Ling and Hon-Shiang Lau; *An improved PERT-type formula for standard deviation*; March; 273
Lau, Hon-Shiang and A. Hing-Ling Lau; *An improved PERT-type formula for standard deviation*; March; 273
Liu, Liming and Xiaoming Liu; *Dynamic and static job allocation for multi-server systems*; September; 845
Liu, Xiaoming and Liming Liu; *Dynamic and static job allocation for multi-server systems*; September; 845

McGinnis, L.F., S. Narayanan, D.A. Bodner, U. Sreekanth, T. Govindaraj and C.M. Mitchell; *Research in object-orientated manufacturing simulations: an assessment of the state of the art*; September; 795
Marchandon, S., D.C. Schmidt, J. Haddock, G.C. Runger, W.A. Wallace and R.N. Wright; *A methodology for formulating, formalizing, validating and evaluating a real-time process control advisor*; March; 235
Mitchell, C.M., S. Narayanan, D.A. Bodner, U. Sreekanth, T. Govindaraj and L.F. McGinnis; *Research in object-orientated manufacturing simulations: an assessment of the state of the art*; September; 795
Mize, J.H. and S.C. Karacel; *A formal structure for discrete event simulation. Part II: Object-oriented software implementation for manufacturing systems*; March; 217
Mollaghasemi, M., D.D. Briggs and J.A. Sepúlveda; *An automated approach for planning mass tactical airbourne operations*; September; 765

Narayanan, S., D.A. Bodner, U. Sreekanth, T. Govindaraj, L.F. McGinnis and C.M. Mitchell; *Research in object-orientated manufacturing simulations: an assessment of the state of the art*; September; 795
Nembhard, H.B.; *Simulation using the state-space representation of noisy dynamic systems to determine effective integrated process control delights*; March; 247

Rojas, J., D. Veeramani and Kung-Jeng Wang; *Modeling and simulation of auction-based shop-floor control using parallel computing*; September; 773
Runger, G.C., D.C. Schmidt, J. Haddock, S. Marchandon, W.A. Wallace and R.N. Wright; *A methodology for formulating, formalizing, validating and evaluating a real-time process control advisor*; March; 235

Schmidt, D.C., J. Haddock, S. Marchandon, G.C. Runger, W.A. Wallace and R.N. Wright; *A methodology for formulating, formalizing, validating and evaluating a real-time process control advisor*; March; 235
Sepúlveda, J.A., D.D. Briggs and M. Mollaghasemi; *An automated approach for planning mass tactical airbourne operations*; September; 765
Smith, J., S. Venkatesh, B. Deuermeyer and G. Curry; *Deadlock detection and resolution for discrete-event simulation: multiple-unit seizes*; March; 201
Sreekanth, U., S. Narayanan, D.A. Bodner, T. Govindaraj, L.F. McGinnis and C.M. Mitchell; *Research in object-orientated manufacturing simulations: an assessment of the state of the art*; September; 795

QUALITY AND RELIABILITY ENGINEERING

AUTHOR INDEX FOR 1998

Acosta-Meijia, C. A.; *Monitoring reduction in variability with the range*; June; 513
Aoki, T., T. Dohi, N. Kaio and S. Osaki; *Nonparametric preventive maintenance optimization models under earning rate criteria*; December; 1099

Coit, D.W.; *Economic allocation of test times for subsystem-level reliability growth testing*; December; 1143
Costa, A.F.B.; *Joint $\bar{X}$ and R charts with variable parameters*; June; 503

Deeter, D.L and A.E. Smith; *Economic design of reliable networks*; December; 1161
Dohi, T., T. Aoki, N. Kaio and S. Osaki; *Nonparametric preventive maintenance optimization models under earning rate criteria*; December; 1099
Duffy, J., Songquan Liu, H. Moskowitz, R. Plante and P.V. Preckel; *Assessing multivariate process/product yield via discrete point approximation*; June; 533

Gaver, D.P. and P.A Jacobs; *Methodology for an operationally-based test length decision*; December; 1129
Gertsbakh, I.B. and K.B. Kordonsky; *Parallel time scales and two-dimensional manufacturer and individual customer warranties*; December; 1181
Gonsalvez, D.J.A and R.R. Inman; *A cost-benefit model for production vehicle testing*; December; 1153

Hussain, A.Z.M.O. and D.N.P. Murthy; *Warranty and redundancy design with uncertain quality*; December; 1191

Inman, R.R. and D.J.A. Gonsalvez; *A cost-benefit model for production vehicle testing*; December; 1153

Jacobs, P.A. and D.P. Gaver; *Methodology for an operationally-based test length decision*; December; 1129
Jardine, A.K.S. and F. Zhang; *Optimal maintenance models with minimal repair, periodic overhaul and complete renewal*; December; 1109

Kaio, N., T. Dohi, T. Aoki and S. Osaki; *Nonparametric preventive maintenance optimization models under earning rate criteria*; December; 1099
Kamal, A.H., J.S. Usher and W.H. Syed; *Cost optimal preventive maintenance and replacement scheduling*; December; 1121
Kordonsky, K.B. and I.B. Gertsbakh; *Parallel time scales and two-dimensional manufacturer and individual customer warranties*; December; 1181

Lin, Jsen-Shung; *Reliability evaluation of capacitated-flow networks with budget constraints*; December; 1175
Liu, Songquan, J. Duffy, H. Moskowitz, R. Plante and P.V. Preckel; *Assessing multivariate process/product yield via discrete point approximation*; June; 533
Longnecker, M., D.H. Timmer and J. Pignatiello Jr; *The development and evaluation of CUSUM-based control charts for an AR(1) process*; June; 523

Mahoney, J.F.; *The influence of parent population distribution on d_2 values*; June; 563
Moskowitz, H., J. Duffy, Songquan Liu, R. Plante and P.V. Preckel; *Assessing multivariate process/product yield via discrete point approximation*; June; 533
Murthy, D.N.P. and A.Z.M.O. Hussain; *Warranty and redundancy design with uncertain quality*; December; 1191

Osaki, S., T. Dohi, T. Aoki and N. Kaio; *Nonparametric preventive maintenance optimization models under earning rate criteria*; December; 1099

Pham, H. and X. Zhang; *A software cost model with warranty cost, error removal times and risk cost*; December; 1135
Pignatiello Jr, J., D.H. Timmer and M. Longnecker; *The development and evaluation of CUSUM-based control charts for an AR(1) process*; June; 523
Plante, R., J. Duffy, Songquan Liu, H. Moskowitz and P.V. Preckel; *Assessing multivariate process/product yield via discrete point approximation*; June; 533
Preckel, P.V., J. Duffy, Songquan Liu, H. Moskowitz and R. Plante; *Assessing multivariate process/product yield via discrete point approximation*; June; 533

Reynolds Jr, M.R. and Z.G. Stoumbos; *The SPRT chart for monitoring a proportion*; June; 545

Smith, A.E. and D.L., Deeter; *Economic design of reliable networks*; December; 1161
Stoumbos, Z.G. and M.R. Reynolds Jr; *The SPRT chart for monitoring a proportion*; June; 545
Syed, W.H., J.S. Usher and A.H. Kamal; *Cost optimal preventive maintenance and replacement scheduling*; December; 1121

Timmer, D.H., J. Pignatiello Jr and M. Longnecker; *The development and evaluation of CUSUM-based control charts for an AR(1) process*; June; 523

Usher, J.S., A.H. Kamal and W.H. Syed; *Cost optimal preventive maintenance and replacement scheduling*; December; 1121

Zhang, F. and A.K.S. Jardine; *Optimal maintenance models with minimal repair, periodic overhaul and complete renewal*; December; 1109
Zhang, X. and H. Pham; *A software cost model with warranty cost, error removal times and risk costs*; December; 1135

SUBJECT INDEX FOR 1998

2140

Mahoney, J.F.; *The influence of parent population distribution on d_2 values*; June; 563

2305

Gaver, D.P. and P.A. Jacobs; *Methodology for an operationally-based test length decision*; December; 1129

2320

Dohi, T., T. Aoki, N. Kaio and S. Osaki; *Nonparametric preventive maintenance optimization models under earning rate criteria*; December; 1099

Zhang, F. and A.K.S. Jardine; *Optimal maintenance models with minimal repair, periodic overhaul and complete renewal*; December; 1109

Usher, J.S., A.H. Kamal and W.H. Syed; *Cost optimal preventive maintenance and replacement scheduling*; December; 1121

2325

Costa, A.F.B.; *Joint $\bar{X}$ and* R *charts with variable parameters*; June; 505

Timmer, D.H., J. Pignatiello, Jr and M. Longnecker; *The development and evaluation of CUSUM-based control charts for an AR(1) process*; June; 525

Reynolds, Jr. M.R. and Z.G. Stoumbos; *The SPRT chart for monitoring a proportion*; June; 545

Zhang, X. and H. Pham; *A software cost model with warranty cost, error removal times and risk costs*; December; 1135

2330

Coit, D.W.; *Economic allocation of test times for subsystem-level reliability growth testing*; December; 1143

Inman, R.R. and D.J.A. Gonsalvez; *A cost-benefit model for production vehicle testing*; December; 1153

Deeter, D.L. and A.E. Smith; *Economic design of reliable networks*; December; 1161

Lin, Jsen-Shung; *Reliability evaluation of capacitated-flow networks with budget constraints*; December; 1175

2335

Duffy, J., S. Liu, H. Moskowitz, R. Plante and P.V. Preckel; *Assessing multivariate process/product yield via discrete point approximation*; June; 535

2350

Gertsbakh, I.B. and K.B. Kordonsky; *Parallel time scales and two-dimensional manufacturer and individual customer warranties*; December; 1181

Hussain, A.Z.M.O. and D.N.P. Murthy; *Warranty and redundancy design with uncertain quality*; December; 1191

2450

Acosta-Mejia, C.A.; *Monitoring reduction in variability with the range*; June; 515

GUEST REVIEWERS FOR 1998

Susan L. Albin, Rutgers University
Christos Alexopoulos, Georgia Institute of Technology
Layth C. Alwan, University of Wisconsin-Milwaukee
Raid W. Amin, University of West Florida
Bruce Ankenman, Northwestern University
Francisco Arcelus, University of New Brunswick
Jesse C. Arnold, Virginia Polytechnic Institute
Harold Ascher, Potomac, Maryland
Adnan Aswad, University of Michigan-Dearborn
Alberto Avritzer, AT&T Laboratories

Do Sun Bai, Korea Advanced Institute of Science and Technology
N. Balakrishanan, McMaster University
Ashok K. Bansal, University of Delhi
Russell R. Barton, Pennsylvania State University
Julie Berube, University of Michigan
U. Narayan Bhat, Southern Methodist University
Wallace Blischke, University of the City of Los Angeles
Philip Boland, University College Dublin
Christopher J. Burges, Bell Laboratories
Laura Burke, Lehigh University
Jai-Hyun Byun, Gyeongsang National University

Charles W. Champ, Georgia Southern University
Chun K. Chan, AT&T Laboratories
Jeya Chandra, Pennsylvania State University
Shing Chang, Kansas State University
Argon Chen, National Taiwan University
Chung Chen, Syracuse University
Guangming Chen, Morgan State University
Shaoxiang Chem, Nanyang Technical University
Byung-Rae Cho, Clemson University
Youn-Min Chou, Univeristy of Texas at San Antonio
W. C. Chien, Bell Laboratories
David W. Coit, Rutgers University
Elart von Collani, University of Wurzburg
Antonio Fernando Branco Costa, UNESP-Campus de Guaratingueta
Lawrence H. Crow, General Dynamics
Stephen V. Crowder, Sandia National Laboratories

Tapas Das, University of Northern Iowa
Johan de Kleer, Xerox Palo Alto Research Center
Enrique Del Castillo, University of Texas at Arlington
S. O. Duffuaa, King Fahd University of Petroleum and Minerals

Robert G. Easterling, Sandia National Laboratories
Nader Ebrahimi, Northern Illinois University
Elsayed A. Elsayed, Rutgers University
John English, University of Arkansas
Luis A. Escobar, Louisiana State University

Nasser S. Fard, Northeastern University
Flavio Fogliatto, Rua dos Andradas, Brazil
Paul Franklin, Lucent Technologies
Tsuneo Furuyama, NTT Software Laboratories

Fah Fatt Gan, National University of Singapore
Richard Gerth, Ohio University

N. A. J. Hastings, Queensland University of Technology
Douglas M. Hawkins, University of Minnesota
A. J. Hayter, Georgia Institute of Technology
Russell G. Heikes, Georgia Institute of Technology
Sunderesh S. Heragu, Rensselaer Polytechnic Institute
Stephen Herschkorn, Rutgers University
D. P. Heyman, AT&T Laboratories
Tim Hill, University of Hawaii
Sung-Hoon Hong, Rutgers University
Eva Hudlicka, Psychometrix
Thomas Hsiang, Universal Foods Corporation

Armann Ingolfsson, University of Alberta
Hariharan K. Iyer, Colorado State University

A. K. Jain, Lucent Technologies
Rong-Hong Jan, National Chiao Tung University
Andrew K. S. Jardine, University of Toronto
Karen L. Jensen, Alcoa Technical Center

S. Kapoor, University of Illinois-Urbana
Kailash Kapur, University of Washington
J. Bert Keats, Arizona State University
Masaaki Kijima, Tokyo Institute of Technology
Morton Klein, Columbia University
Samuel Kotz, University of Maryland
Anup Kumar, University of Louisville
Way Kuo, Texas A&M University

Tze Leung Lai, Stanford University
Thomas Landers, University of Arkansas
Lawrence Leemis, The College of William and Mary
Ming Liang, University of Ottawa
H. H. Lin, National Sun Yat-Sen University
C. J. Lu, National Cheng-Kung University
John M. Lucas, Wilmington, Delaware
Michael LuValle, Lucent Technologies

Saeed Maghsoodloo, Auburn University
Colin Mallows, AT&T Laboratories
Norman A. Marlow, Motorola
Christina Mastrangelo, University of Virginia
Mainak Mazumdar, University of Pittsburg
Edward McDowell, Oregon State University
Amit Monga, KPMG Consulting
Douglas Montgomery, Arizona State University
D. N. P. Murthy, University of Queensland

Joel Nachlas, Virginia Polytechnic Institute
Matoteng M. Ncube, University of West Florida
Lloyd S. Nelson, Londonderry
Peter R. Nelson, Clemson University

Marcus O'Connor, University of New South Wales
O. Geoffrey Okogbaa, University of South Florida
Shunji Osaki, Hiroshima University

Hoang Pham, Rutgers University
Joseph Pignatiello, Texas A&M University
Robert Plante, Purdue University
Sharad S. Prabhu, SAS Institute Inc.

M. A. Rahim, University of New Brunswick
Tzvi Raz, Tel Aviv University
Paul Reeser, AT & T Laboratories
William Remus, University of Hawaii
Marion R. Reynolds, Jr., Virginia Polytechnic Institute
Thomas P. Ryan, Case Western Reserve University

Erwin M. Saniga, University of Delaware
Thomas Savits, University of Pittsburgh

Neil C. Schwertman, California State University
Perwez Shahabudden, Columbia University
J. Jan Shi, The University of Michigan
Irv Shiffer, Ethicon
Thomas S. Shively, University of Texas
Huan-Jyh Shyur, FAA Technical Center
James R. Simpson, United States Air Force Academy
Minoru Siotani, Meisei University
Alice E. Smith. University of Pittsburg
James L. Smith, Texas Tech University
Refik Soyer, The George Washington University
Wolfgang Stadje, Universitat Osnabruck
Stefan Steiner, University of Waterloo
Hal. S. Stern, Iowa State University
Robert Storer, Lehigh University
Joe Sullivan. Mississippi State University
Jill A. Swift, Tullahoma Tennessee

George Tagaras, Aristoteles University of Thessaloniki
Jen Tang, Purdue University
Kwei Tang, Louisiana State University
William A. Thompson, University of Missouri
James C. C. Torng, National Yunlin Institute of Technology
Michael Tortorella, Lucent Technologies
Kwok-Leung Tsui, Hong Kong University of Science and Technology
Barbara Turpin, Rutgers University

Lyle Ungar, University of Pennsylvania
John S. Usher, University of Louisville

Stephen B. Vardeman, Iowa State University

C. Ming Wang, National Institute of Standards and Technology
Sheng-De Wang, National Taiwan University
Don G. Wardell, University of Utah
Gary S. Wasserman, Wayne State University
A. J. Watkins, University of Wales
George O. Wesolowsky, McMaster University
Joseph Wilder, Center Computer Aid Ind. Pro.
Thomas R. Willemain, Rensselaer Polytechnic Institute
Richard J. Wilson, The University of Queensland
Peter S. Wludyka, University of North Florida
William Woodall, University of Alabama
M. Xie, National University of Singapore

Kai Yang, Wayne State University
Ruey Huei Yeh, National Taiwan Institute of Technology
Steven A. Yourstone, University of New Mexico

Nick Zaino, Eastman Kodak Company
Ming Zuo, City University of Hong Kong
